

## WELCOME TO TERM 2!

The importance of developing swimming skills and learning to love the water cannot be understated. As we enter Term 2, our team is committed to providing a safe and nurturing environment where everyone can maximise their potential. Whether it's watching a Toddler take their first tentative steps into the water or a seasoned swimmer refine their stroke technique, we are continually amazed and inspired by our students every single lesson!

We have a big term planned and can't wait to see everyone splashing and smiling in the water again. See you in the pool!

## UV FILTER UPGRADE

We have recently upgraded our filtration system with a new UV Filter! Benefits include:

**Enhanced Water Quality:** our new filter effectively eliminates contaminants such as bacteria, viruses, algae, and organic matter from the water, ensuring a safer and cleaner swimming environment for students and instructors.

**Prevention of Waterborne Illnesses:** UV filtration provides an additional layer of protection against waterborne illnesses by effectively neutralizing pathogens that may be present in the water, thereby reducing the risk of infections among swimmers.

**Improved Air Quality:** improved indoor air quality within the swim school facility to create a more comfortable and pleasant environment for both students and staff.
